

PUT YOUR SPRAY PROGRAM ON THE FAST TRACK TO HIGHER PERFORMANCE

DRONEZONE™ RECHARGED is an EPA-registered plant growth regulator designed to enhance the abiotic stress resistance of specific crops. The salicylic acid helps in stress resistance and, thus, allows better management of yield and quality for the production of crops.

DRONEZONE RECHARGED contains systemic compounds that function to stimulate the plant's natural defenses and support vigorous growth.

PRODUCT BENEFITS

- **Enhances abiotic stress resistance of the crop**
- **Stimulates the plant's natural defenses and support vigorous growth.**
- **Allows better management of yield and quality for the production of crops.**

EPA REG. NO. 90866-30-95352

TECHNOLOGIES

PRINCIPAL FUNCTIONING AGENTS

ACTIVE INGREDIENTS:	By Wt.
Choline Chloride:.....	15.00%
Salicylic Acid:	5.20%
OTHER INGREDIENTS:.....	79.80%
TOTAL:.....	100.00%

DIRECTIONS FOR USE

DRONEZONE RECHARGED works best when applied before disease signs or symptoms appear. Uniform and thorough spray coverage is essential for optimum performance.

Do not tank mix with agrichemical products that are alkaline in nature. Make sure the final spray mix is below pH 7.0. Do not apply if rain is expected within 2 hours of application.

RECOMMENDED USE RATE

A 0.1% v/v (1 gallon per 1000 gallons of carrier) solution of DRONEZONE RECHARGED provides the optimum concentration for best performance.

See label for additional spray volumes and application details.

PRODUCT DETAILS

Available in 2x2.5 gallon jugs (36 cases per pallet).
Storage: Store above 32°F
