

ADVANCED PLANT NUTRITION

DRONEZONE™ TAKEOFF is a robust micronutrient powered by a high amount of potassium with added sulfur and boron. These nutrients are essential for maximizing growth stages in multiple crops.

PRODUCT BENEFITS

- Supports proper plant maturation by improving overall plant health
- Improves plant's root strength and disease resistance

GUARANTEED ANALYSIS

4-0-20

Total Nitrogen (N)	4.00%
1.33% Ammoniacal nitrogen	
2.67% Urea nitrogen	
Soluble Potash (K ₂ O).....	20.00%
Sulfur(S).....	8.00%
8.00% Combined sulfur	
Boron (B).....	0.50%
Fulvic Acid.....	0.50%

Derived from Urea, Ammonium Thiosulfate, Potassium Thiosulfate, Potassium Acetate, Boric Acid

RATE RECOMMENDATIONS

FIELD, ROW, VEGETABLE AND VINE CROPS:

Apply 1-2 quarts per acre application throughout the growing season. More frequent applications at 1 pint per acre may be needed to correct deficiencies once they occur.

Optimum rate of application will vary depending on soil properties(such as pH, organic matter content, texture) weather conditions, time of year, plant species and general health. For best results, follow soil/tissue test recommendation.

PRODUCT AVAILABILITY

Available in 2x2.5 gallon jugs (36 cases per pallet) or 250-gallon totes.

Density: 10.0 lb/gal
